OFFICE FURNITURE IN HARMONY WITH NATURE

ALL THE FUTURE STYLES ARE IN NATURE

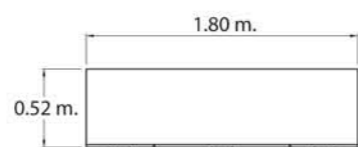

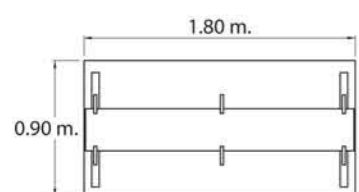

Auguste Rodin

The **green**® range was created with environmental sustainability in mind. Through sensitive green design and state of the art technology this outstanding range offers a beautiful balance between the needs of nature and modern corporate life.

We've taken the best of recyclable elements of nature, and created office furniture with all the latest advantages of functionality (multiple configurations), ergonomics, comfort and performance.

Wood, aluminium and glass have been chosen as fundamental elements of design not just because they look stunning but because they are all recyclable. All this means that your investment in the **green**® range is good for your business as well as the planet.
